Evening Brief

Date: Sunday, August 26, 2018

Weather Summary

A cold front will plunge down across the southern half of the Great Basin today, bringing dry, breezy conditions to southern portions of NV & UT and the AZ Strip. Further north, behind the front, much cooler temperatures across the Northern half of NV/UT and all of ID/Western WY with afternoon temperatures about 10-20 degrees cooler than Sunday, and minimum RH above 25%. Widespread showers expected across most of ID into Wyoming.

Gradual warming and drying towards midweek, then increasing WSW winds later in the week, as another low pressure system approaches from the west.

Preparedness Levels & Great Basin Fire Activity (from WFDSS)

Great Basin	5	Light IA Attack Activity
National	5	GB New Fires and Acres: 12 fires 163 acres; 83,868 acres large fire growth

Great Basin Fuel Status [interactive link](#) (Use Edge, Chrome or Firefox browsers)

Fuels and Fire Behavior advisory has been issued for [Northern Great Basin](#)

Fuels/Fire Potential

A Fuel/Fire Behavior advisory has been **UPDATED** for North/West Nevada into Idaho and Northern Utah. This advisory can be found here: <https://gacc.nifc.gov/gbcc/fuels.php>

Critically dry fuels across the northern half of the Geographic Area will modify greatly over the next 2-3 days, due to wetting rains across much of ID/WY, and to a lesser extent, due to the much higher humidity across Northern NV/UT.

Sagebrush Live Fuel Moisture levels across the northern half of the Great Basin are near or below mid-August normals, and grasses are cured in all areas. ERC's are below the 50th percentile across most of the southern half of Nevada, the southern 2/3 of Utah, into the AZ Strip.

Drier air will move across much of the Great Basin by the middle this coming week. This will rapidly dry finer fuels across Northern NV and NW UT back towards critical levels. Across ID/WY this will be a much more gradual process, due to the recent wetting rains.

Resources:

Aviation within the Great Basin

- 1 VLAT's, 6 LATs, 2 CL-415's
- 21 SEATs, 2 Fire Bosses
- 10 Type 1 Helicopters / 9 Committed
- 11 Type 2 Helicopters / 7 Committed
- 20 Type 3 Helicopters

Crews Committed within the Great Basin

- 13 IHCs Committed / 0 Available
- 23 T-2 IAs Committed / 0 Available

Current Incident Details
